

Can you volunteer 3 hours to save a baby this Giving Season?

Our goal: To process 10k ounces of mothers' milk every week during The Giving Season. Last year, our volunteers helped us process 10k ounces of milk over the entire season.

Purpose: Our bank has been growing exponentially to meet the needs of Florida's growing demand for safe pasteurized donor human milk. We will supply this milk to medically fragile and premature babies in Florida's neonatal intensive care units.

How you can help: We are looking for people like you to volunteer for a 3 hour shift any weekday from November 28th to December 23rd. No prior lab experience is necessary. You are always welcome to sign up for multiple shifts throughout the weeks. You will be working in our degloving lab and preparation room to prepare life-saving mothers' milk for tiny babies before it is pasteurized.

Visit our Track it Forward site to sign up for a shift.
