Washing instructions for tablecloths!

- Pre-treat stains with a small amount of detergent or pretreatment solution
- Machine wash with cold water and household detergent
- Tumble dry on low setting
- Immediately remove from dryer when finished
- Do not dry too many tablecloths at once....depending on the size of your drier you cannot overload or wrinkles will be very hard to remove
- Only iron on a very LOW setting as these are polyester cloths that will damage easily with too much heat.

How to Fold a Round Tablecloth Head off wrinkles with this method.

Lay the tablecloth flat, then fold in half into a half-moon.

Bring the rounded edge toward the straight fold, so the round end meets the middle of the cloth's flat edge.

Fold in half lengthwise.
